Dear Client,

Congratulations on buying a light produced by WALDI and you made a good choice! Nevertheless, for your own security we recommend to carefully read this manual.

Instruction for installation:

1. The light is provided for a ceiling-mounting in dry rooms.
2. The light is provided for a permanent mounting. It may be fastened on normal inflammable surfaces.
3. We recommend to ask a trained electrician to perform the connection (VDE 0100).
4. When mounting the light, make sure that the power cord is stress free (switch "out", fuse "out").

Installation:

1. After you completed the connection, put the supplied cover on the luster terminals. Then position the terminal on the pin inside the lamp (Fig. 1).
2. Should there be a protection wire at-site, insulate it appropriately (Fig. 1).
3. The light is fixed by screws, if necessary use dowels (not part of the delivery) (Fig. 3).
4. Cut along the black line of the enclosed fire-trail, pull of the glue strip and attach it behind the lamp (see above picture).
5. After the light is mounted, take the protective caps out of the polybag and press them into the two holes.
6. Be sure not to squash the wires when mounting.

General informations:

1. Please note the minimum distance between the lamp and the floodlit surface marked on the light. The distance is 0,5 m and has to be observed because of possible fire risk. (Fig. 2)
2. Only use the lamp indicated on the light (Fig.4)
3. The light serves only for decoration and is not suited as a child's toy.
4. For safety reasons no other decoration parts should be fastened to the ceiling light.
5. For cleaning the light we recommend to use a dry or slightly damp cloth. Pay attention not to penetrate with the cloth inside the socket. Before cleaning switch off the light! When using a slightly damp cloth, you have to dry the light before switching it on again.
6. Please keep the manual for later communication purposes.

The manufacturer shall not be liable for injuries or damage which are a result of the incorrect use or connection of the lamp. In the case of doubt, please consult a qualified electrician.
