Product can be charged on most NiMH or NiCd chargers utilizing standard dV, dV/dt, time and temperature dynamic charge termination methods. Duracell brand NiMH chargers are recommended for best results.

Delivered capacity is dependent on the applied load, operating temperature, and cut-off voltage. Please refer to the charts and discharge data shown for example of the energy/service life that the battery will provide for various local conditions.

This data is subject to change. Performance information is typical. Contact Duracell for latest information.

StayCharged batteries can be rapidly charged using Duracell 15 minute Charger

*vs. ordinary rechargeable batteries.
